- Vue

Backend
- GIN
- NodeJS

Languages
- Go
- JavaScript
- TypeScript
- Python
- R
- SQL

Database
- SQL Server
- MongoDB
- Firebase

Others
- Docker
- AWS
- Swagger
- Git

EXPERIENCE

Full Stack Developer in Thai Beverage   **(2023)**

https://www.thaibev.com

I worked on a wide range of tasks, including frontend and backend development. I also deployed websites using Kubernetes, GitLab CI/CD, and Docker at a basic level. The main project I worked on was a website for managing products in various warehouses, completed in six months.

Developer on KMUTT BangmodHackathon 2023   **(2023)**

https://github.com/cpe-kmutt-student/bangmod-hackathon-2023

BangmodHackathon is the code competition tournament in KMUTT. In my job, I only create small components for the website.

PROJECT

Scented-Secrets   **(2024)**

https://scented-secrets-1958e.web.app

This project is my Senior Project. It's a project created for people who want to find the perfume that suits them best. The website uses Machine Learning to help predict suitable perfumes. However, the deployed website cannot access the backend because my AWS account has expired. But it can still run locally. You can check it out on my GitHub.
